

FEARSOME CREATURES of the LUMBERWOODS

A limbless reptilian monster that propels itself through the swamps with a propellor-tipped tail? A creature so ashamed of its monstrous appearance that it dissolves into tears when captured? Learn about the snoligoster, the squonk and many other 'fearsome critters' in this field guide written and illustrated by two North American foresters who know them well. Listeners who suspect that these creatures are the stuff of tall tales, will nevertheless do well to look out for slide-rock bolters when vacationing in the Colorado mountains. - Summary by Phil Benson

Read by Phil Benson. Total running time: 00:50:25
